

SCRS Global Oncology

Oncology Education Meeting Summary

June 2021

The team spent most of this meeting reviewing the draft Scope of Work statement. This statement is broken into four sections – **Purpose, Goals, Deliverables, and Constraints**. Each section was broken down and discussed in length. The edited version of this document was shared with the team post-meeting to provide another opportunity for feedback before the scope is finalized.

A copy of the scope of work statement can be found on the SCRS website on the [oncology page](#).

The next meeting will be spent finalizing the scope of work, addressing any outstanding concerns or comments, then taking that scope of work to develop the recommendations which will make up the bulk of the publication.
