

SCRS Global Oncology

Oncology Site Assessment and Engagement Meeting Summary
October 2021

Enhance the learnings
we can deliver
at the upcoming
2022 Oncology Summit.

The team spent most of their time this month discussing the Oncology Site Landscape micro survey. Each question was reviewed individually to assure its applicability and that the supplied answers were sufficient in meeting the needs of the committee. The purpose of this survey is to enhance the learnings we can gain and deliver at the upcoming 2022 Oncology Summit.

Each member had an opportunity to contribute to the discussion, and the edits to the survey will be incorporated and issued to the team for a final review before distributing to oncology sites. **The plan is to distribute this survey on November 15th and allow it to run through the first week of January.**
