Decentralized Trials Workstream Meeting

For the Call Today...

- Work Recap
- Site Challenges Survey
 - Share Results
- Virtual Trial Capable Training – Approach post summit
- Group Work layout

Last Meeting

- Site Challenges Discussion
 - Survey questions
- Future work
- Training Discussion

Work To-Date Recap

- Starting with protocol design – understanding at the site level
- How DCTs are operationalizing/Process flows
- Following a Journey – Patient, Site, Data
- Visual Elements - Settled on the idea of a Subway-type map presentation
- Sub Projects
 - Survey of Site Challenges
 - Virtual Trial Capable Training
- Group Work Pending
- Virtual Trial Capable Training Development

In 2020-2021, were you approached by a sponsor or a CRO to conduct a 100% virtual/decentralized trial (where none of the patient visits would occur at your location)? Please answer based on trials that were planned to be decentralized, rather than changed due to COVID.

Did you Participate?

Why didn't you participate

Other Answers

The CRO literally competed and undercut our budget via decentralized process. Lot of trust lost in CRO because we lost a few hundred thousand dollars in the process.

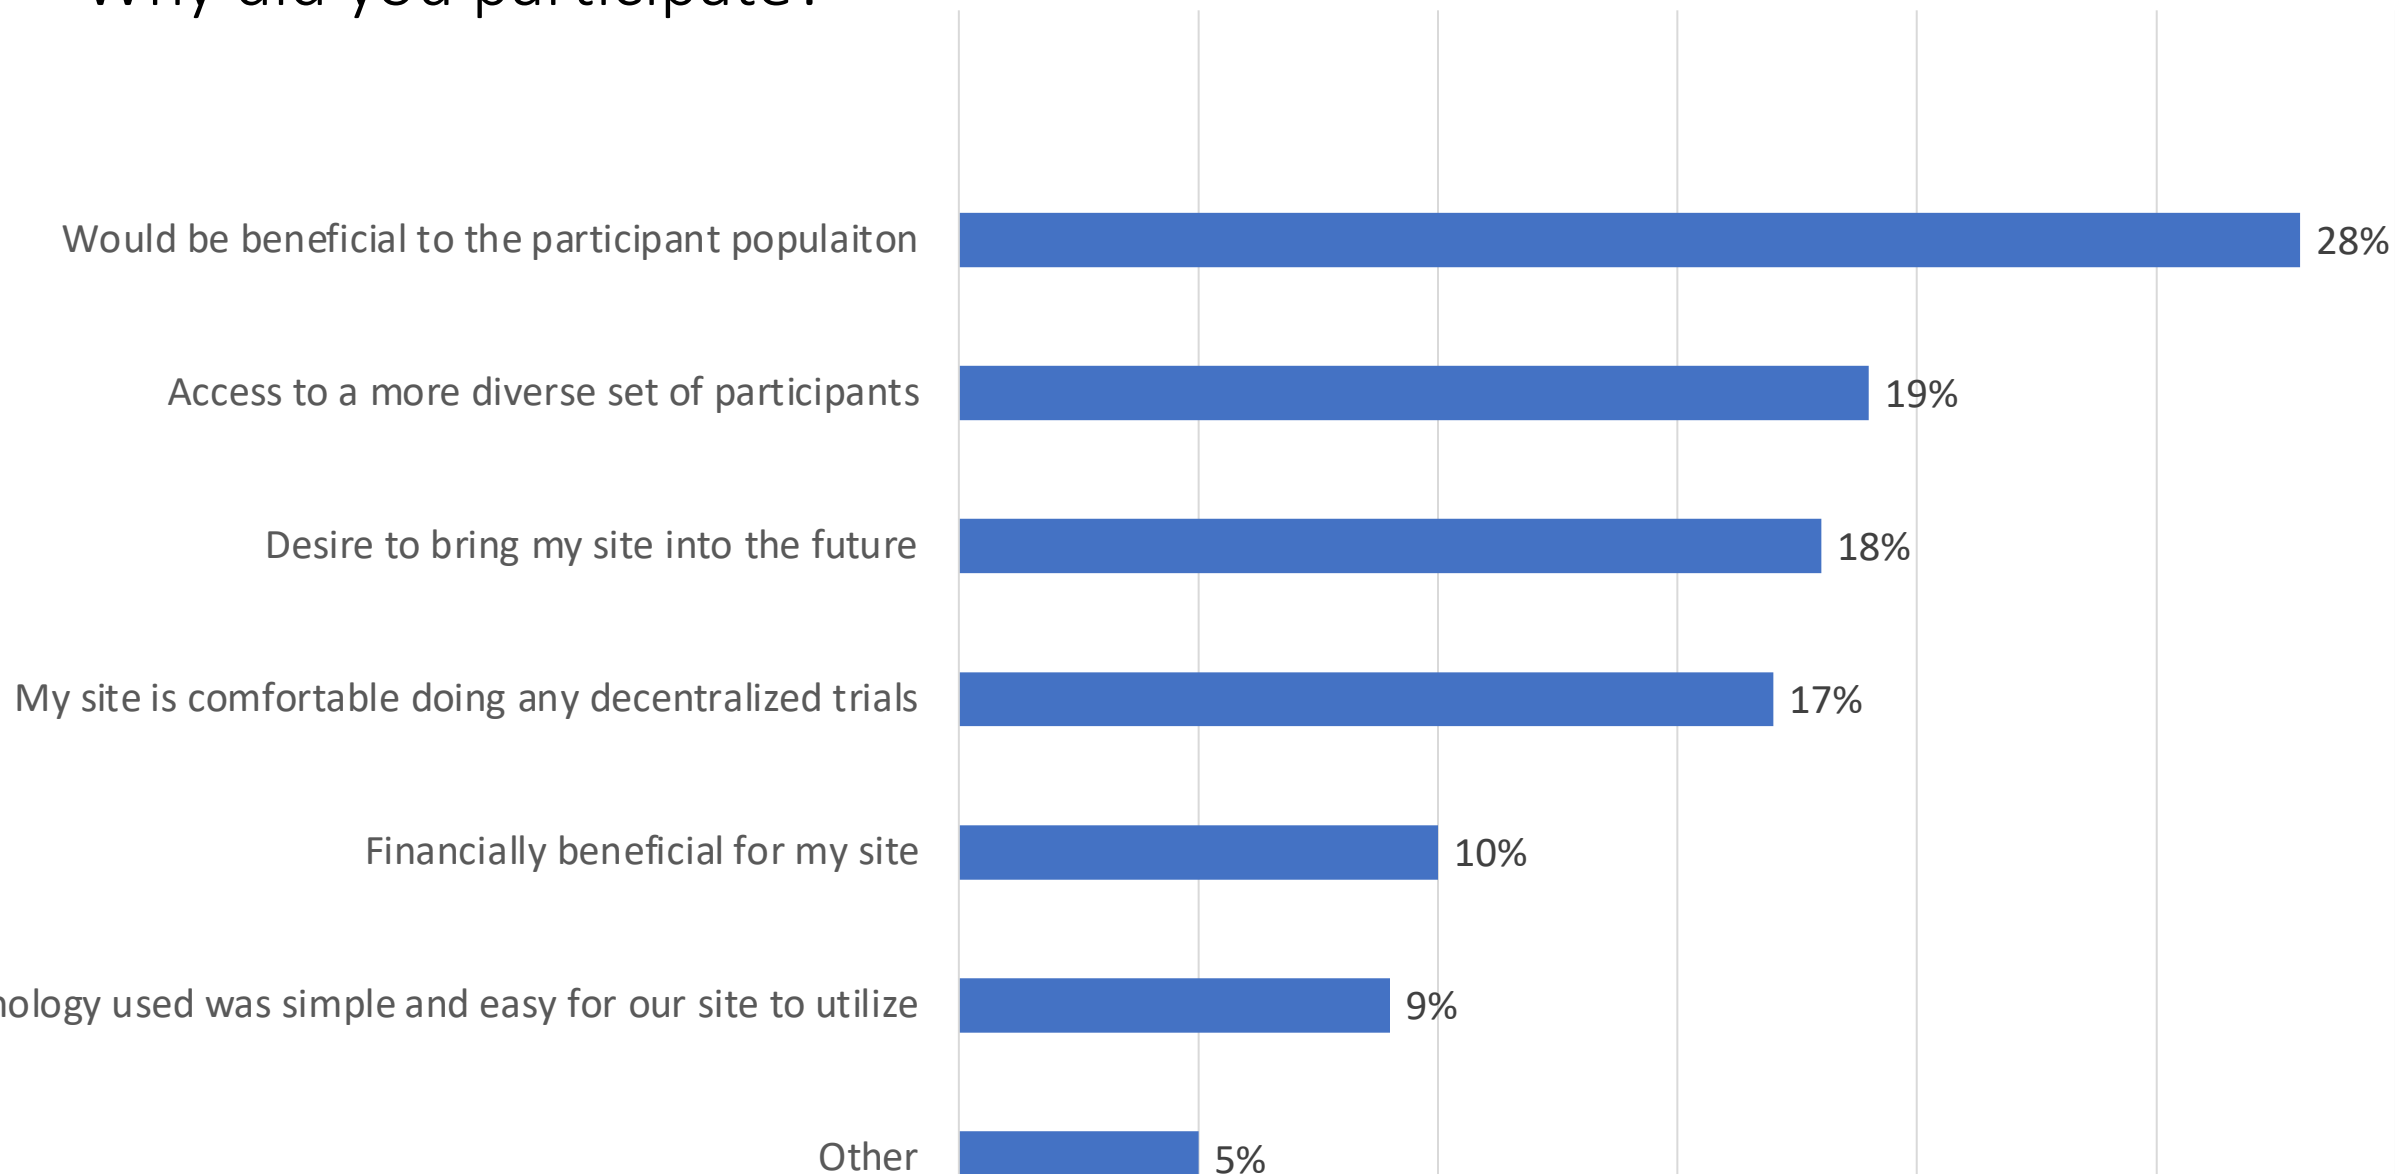

Trial was not planned well, no thought process on site involvement which made it unable to support sponsor delayed trial

No PI and equipment to participate

Was not able to pivot, workforce challenges.

Why did you participate?

In 2020-2021, how many trials at your site converted from a trial with subject site visits to a 100% virtual/decentralized trial (where none of the patient visits would occur at your location)?

In 2020-2021, were you approached by a sponsor or a CRO to conduct a hybrid-type trial (where some but not all of the patient visits are done virtually)? Please answer based on trials that were planned to be hybrid, rather than changed due to COVID.

Did you Participate?

Why did you participate?

Why did you participate? - Other

If you are not on the ship, then you will be left behind.

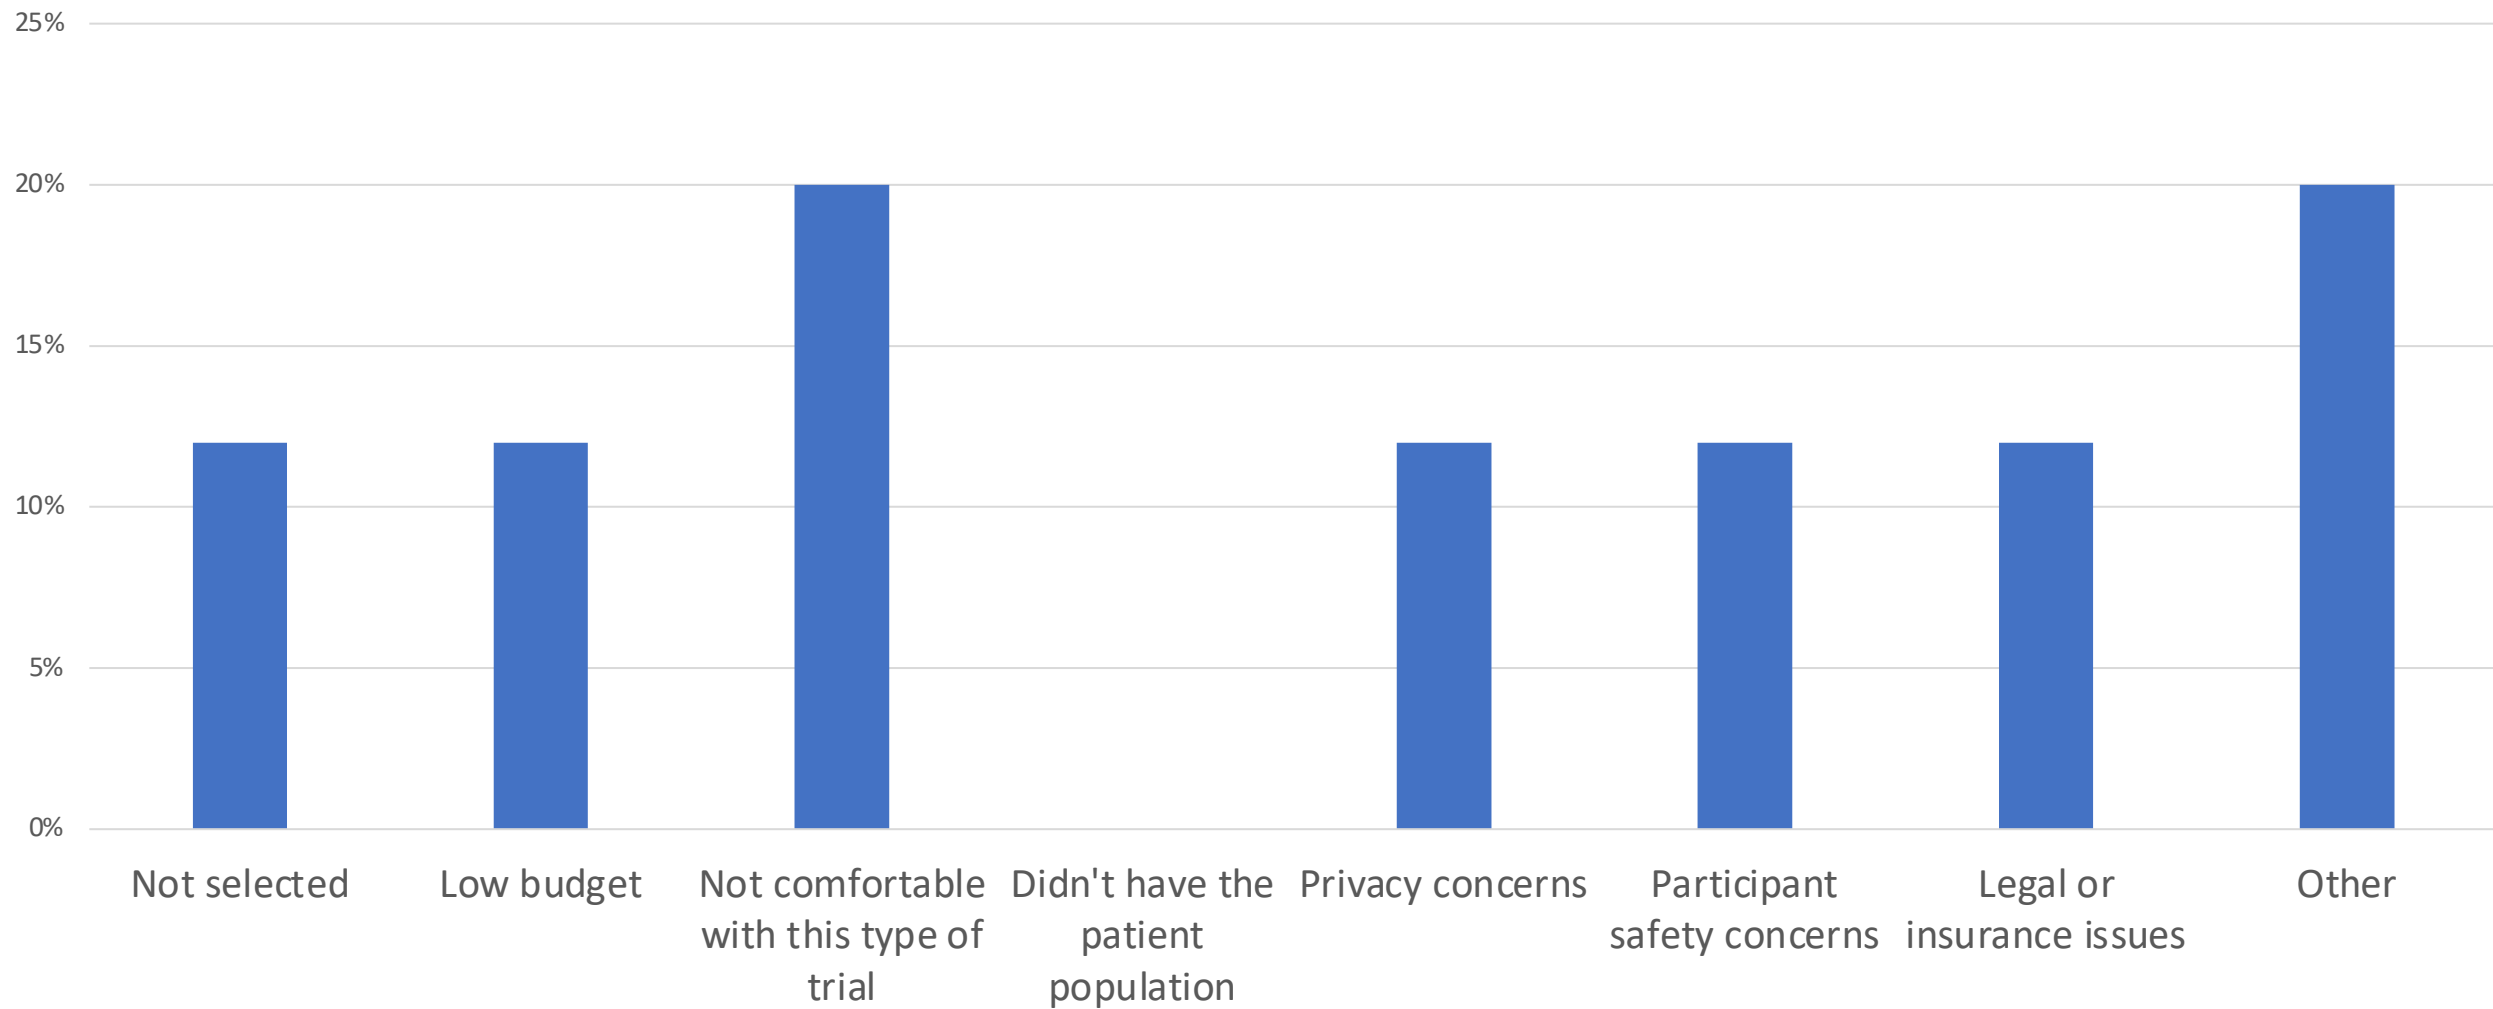

We have frequently performed studies where some of the visits occur via the phone. No trials where visits are visual

COVID related concerns made a hybrid option easier
sponsor request

Accepted study participation with more home visits worked in for whatever reason (could have been due to COVID)

Why didn't you participate?

Why didn't you participate? - Other

patients prefer to come to site

PI not comfortable with delegating to a unknown person

No sure how the PI oversight can be guarantee

In 2020-2021, how many of active trials at your site converted from a trial with subject onsite visits to a hybrid-type trial (where some but not all of the patient visits are done virtually) or gave you the option to conduct visits remotely?

What would you expect to be the biggest challenges for your site in participating in a decentralized / virtual or hybrid trial, if you were to participate? (Rank the top 3)

Top Three – Most Votes in Each Category

- Financial Compensation
- There are no challenges, only benefits
- Legal or Insurance Issues

Challenges of least concern

- The Time it would take to implement
- The Quality of the data
- The Time to educate staff

What have you experienced to be the biggest challenges for your site in participating in a decentralized / virtual or hybrid trial? (Rank the top 3)

Top Answers – Most Challenging

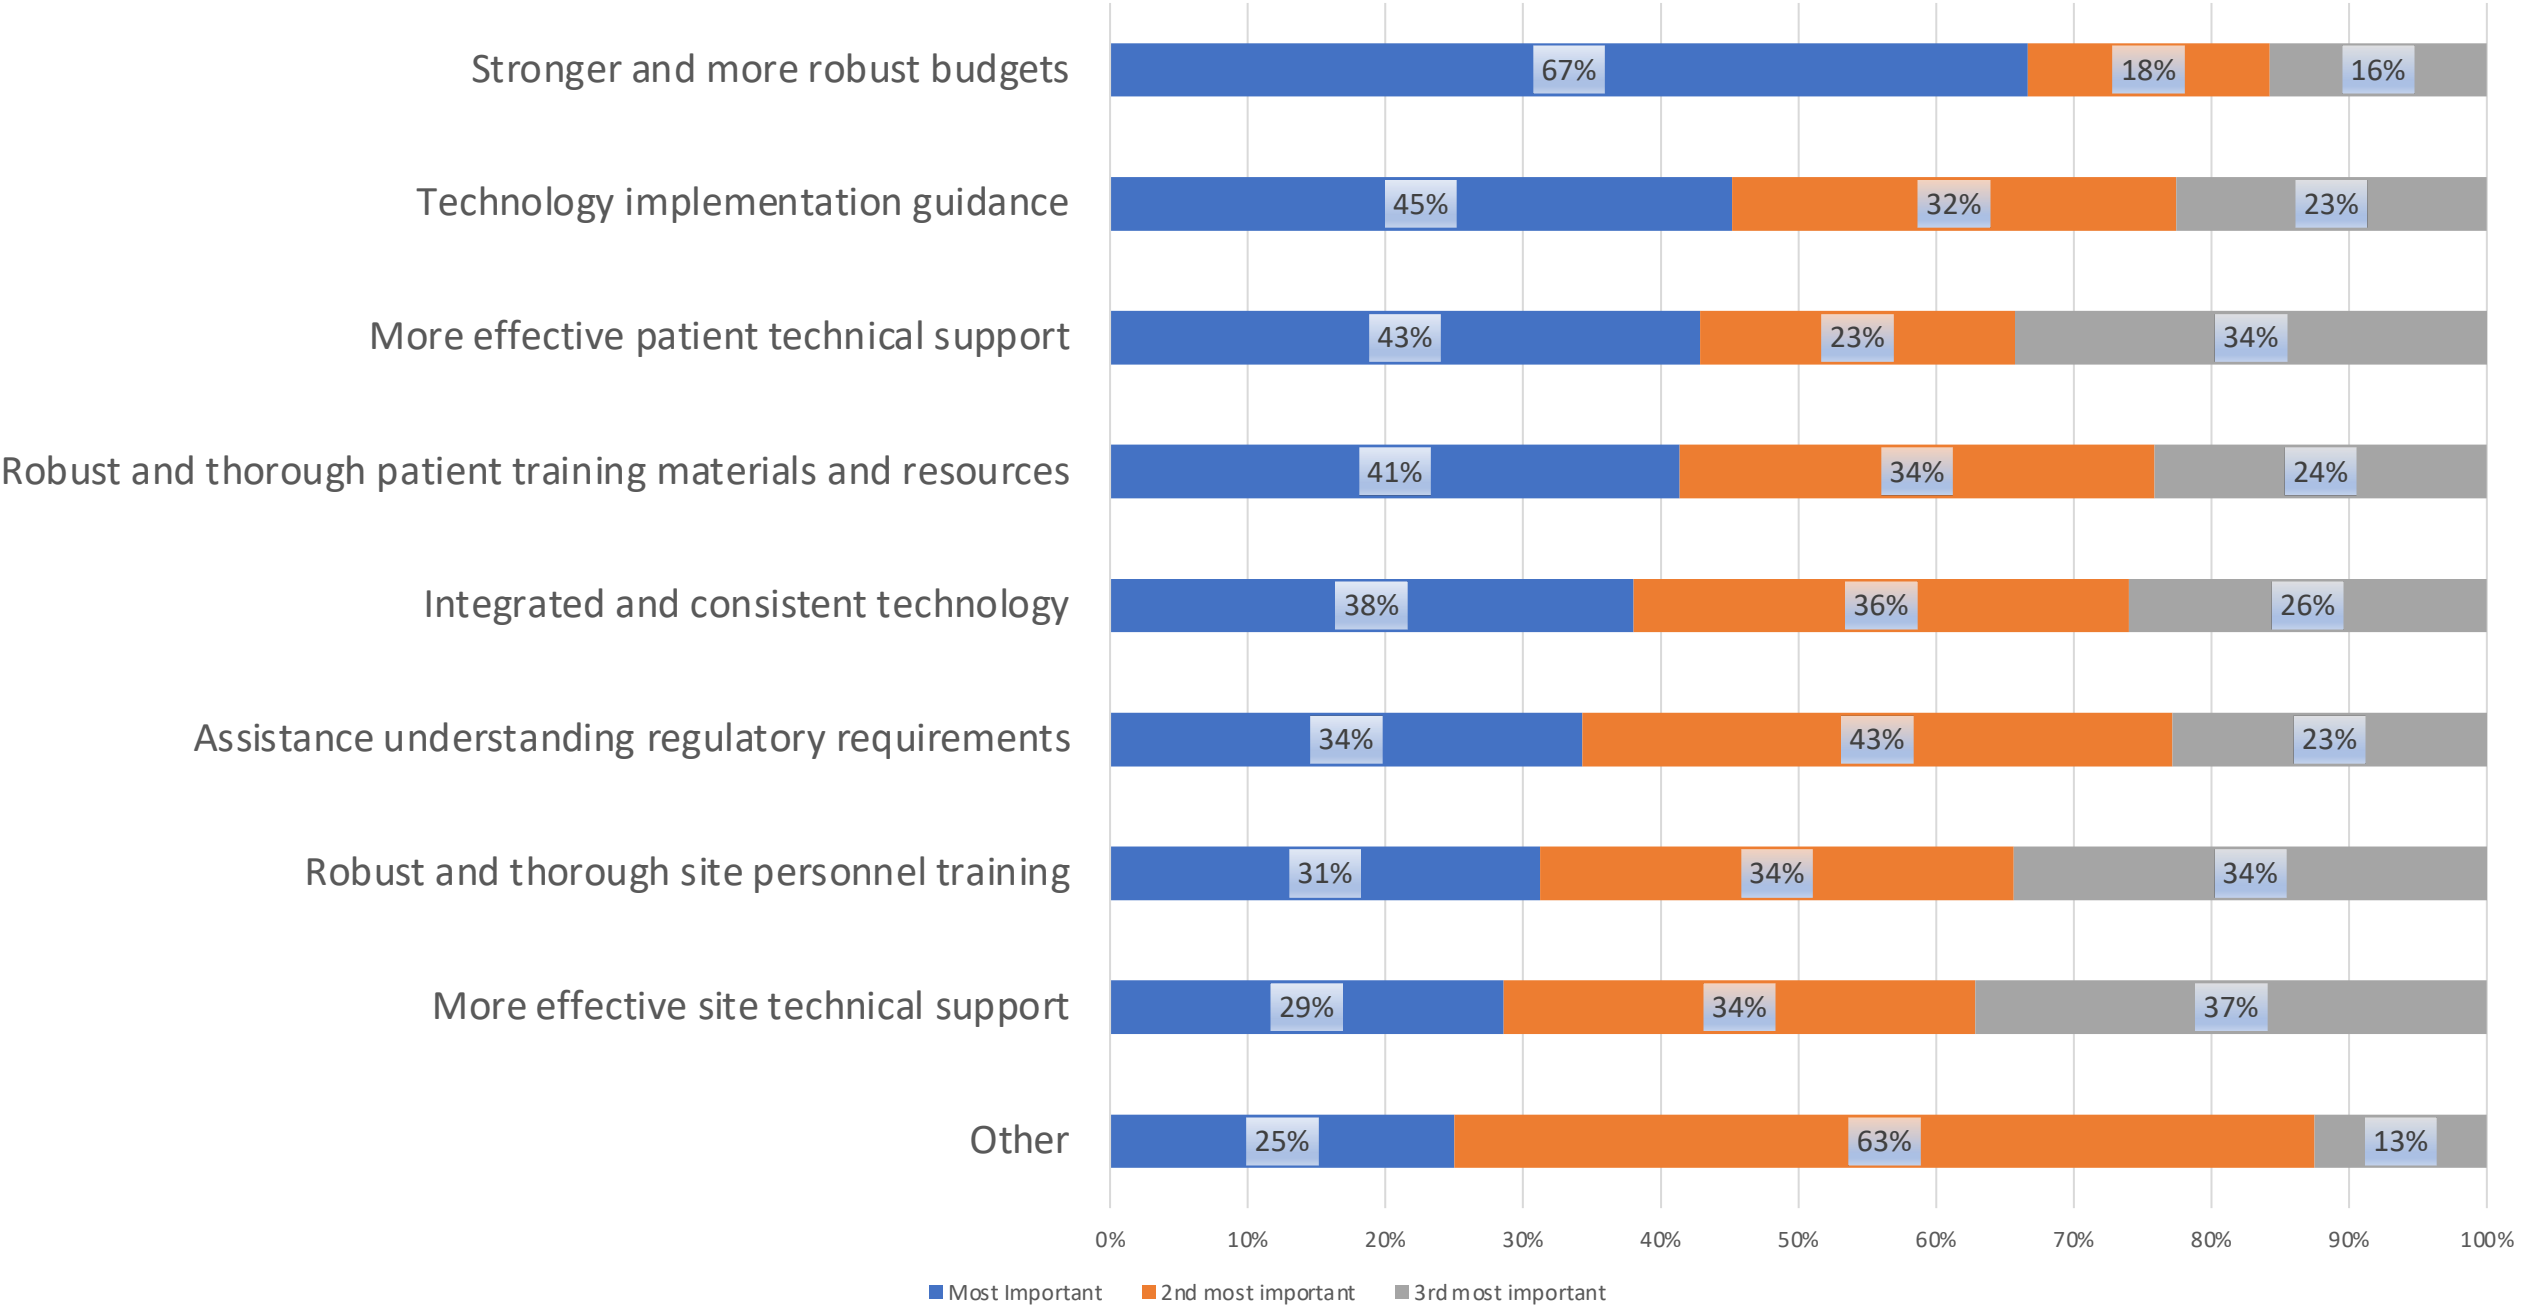

- Financial Compensation
- Having the Capital to invest in their own tech
- Having the necessary staff to implement

Top Answers – Least Challenging

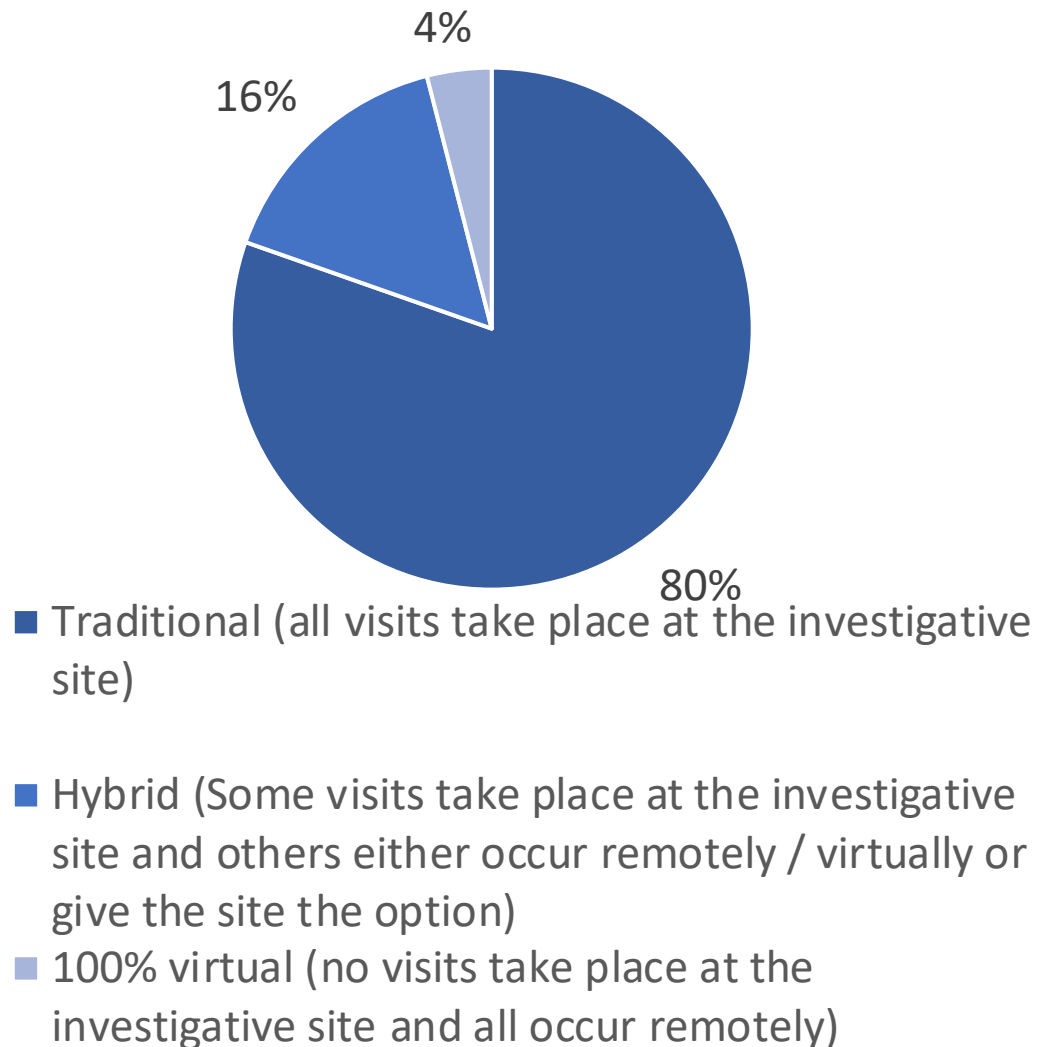

- The Time to implement
- Difficulty for participants to participate
- Participant safety

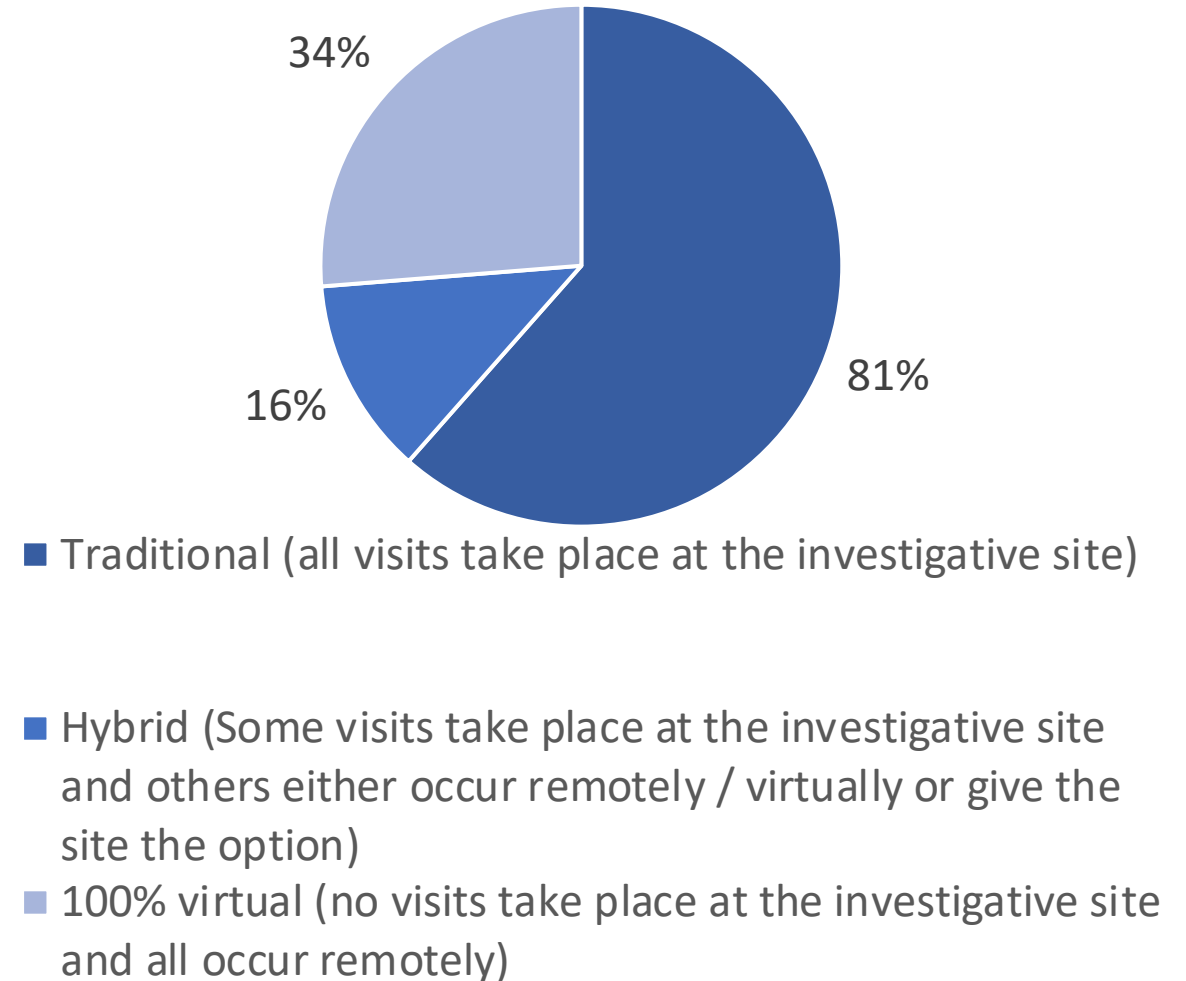

What does your site want or need in the form of support from Sponsors and CROs in regards to participation in

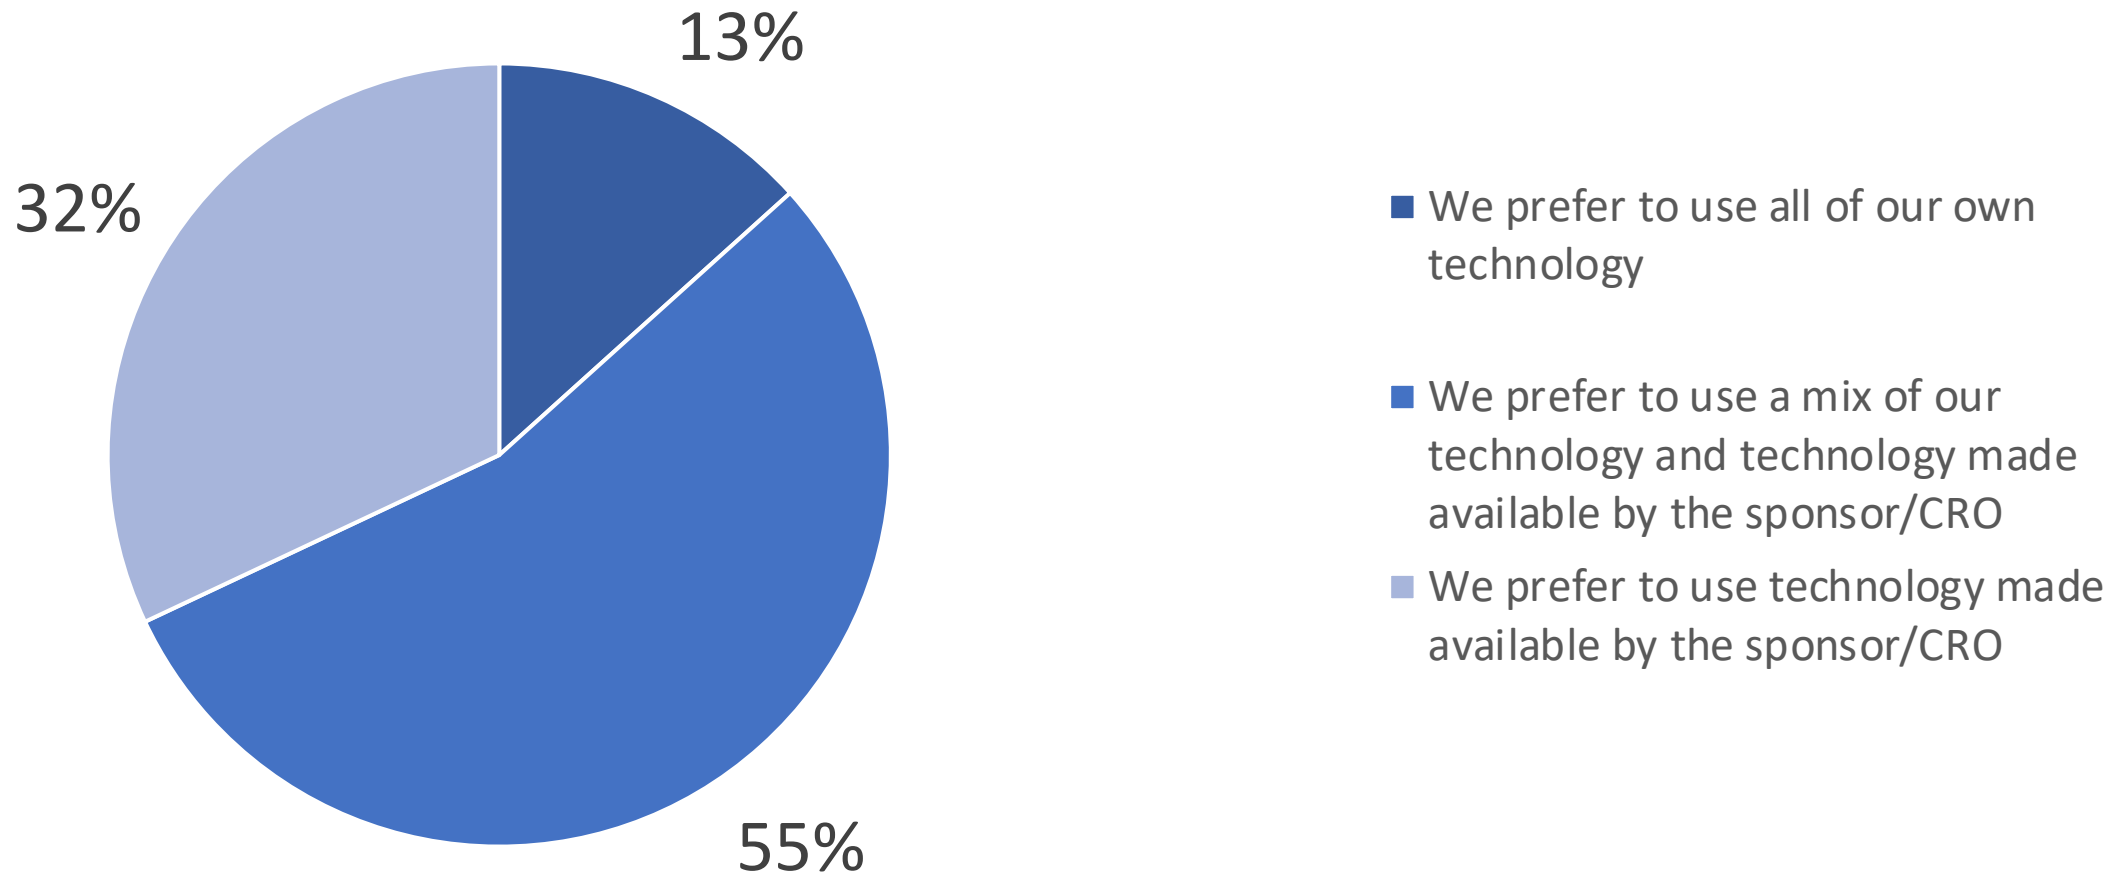

From 2020-present, what percentage of type of clinical trials has your site conducted?

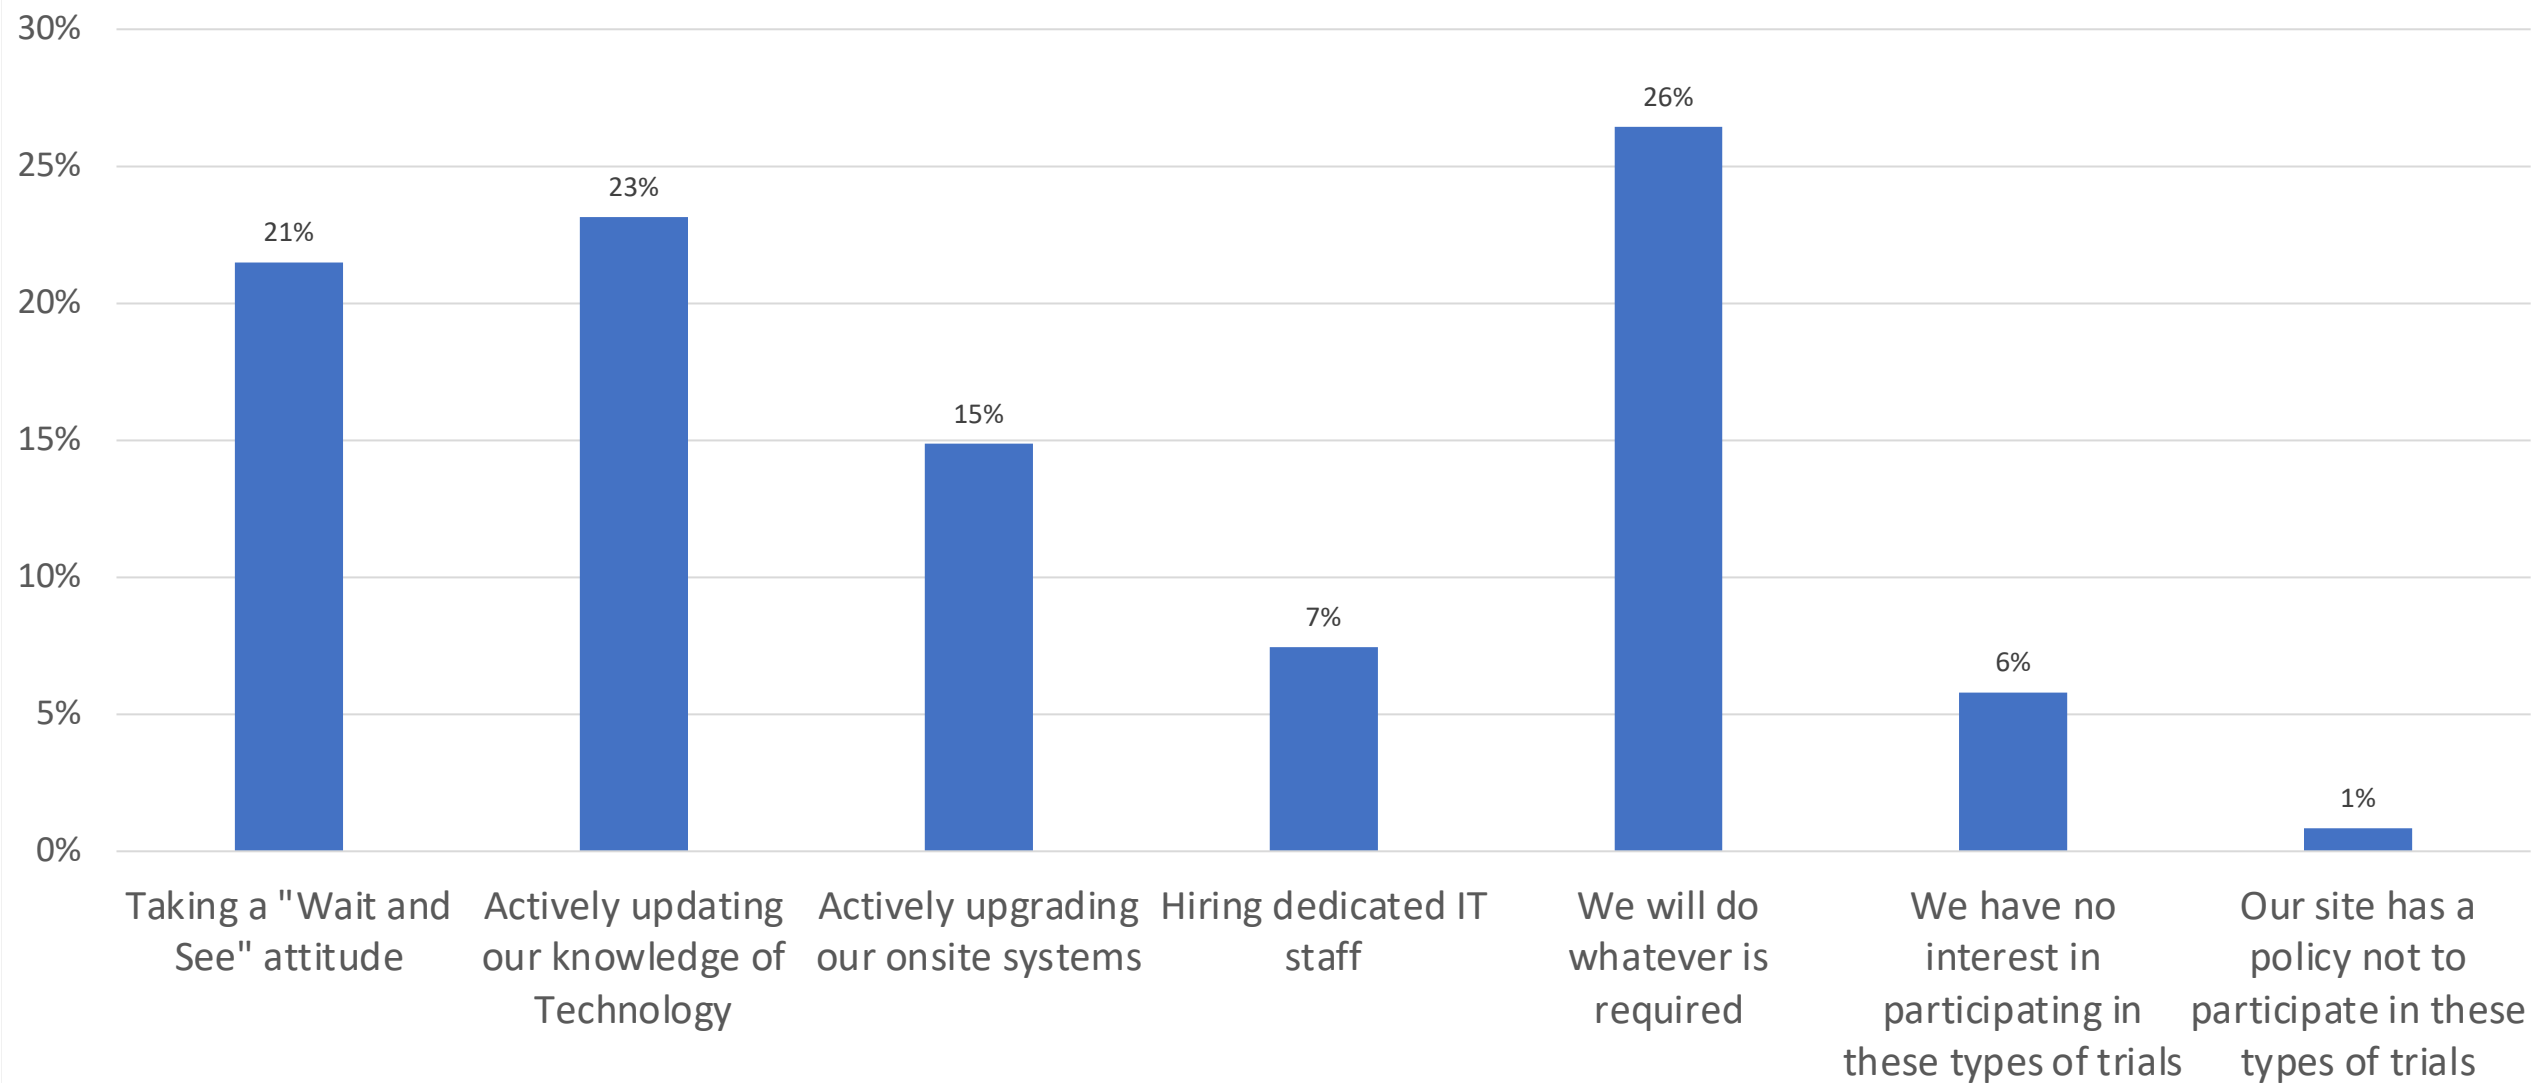

From the present time through 2022, what percentage of type of clinical trials will your site be conducting, based on current feasibility and selections?

When it comes to technology use preferences in 100% decentralized and hybrid decentralized trials, which of the following applies most directly to your site?

What are you doing now, or planning to do, to prepare for 100% decentralized or hybrid decentralized trials? Select all that apply.

Which of the following technologies are you currently using, or have used, at your site? Select all that apply.

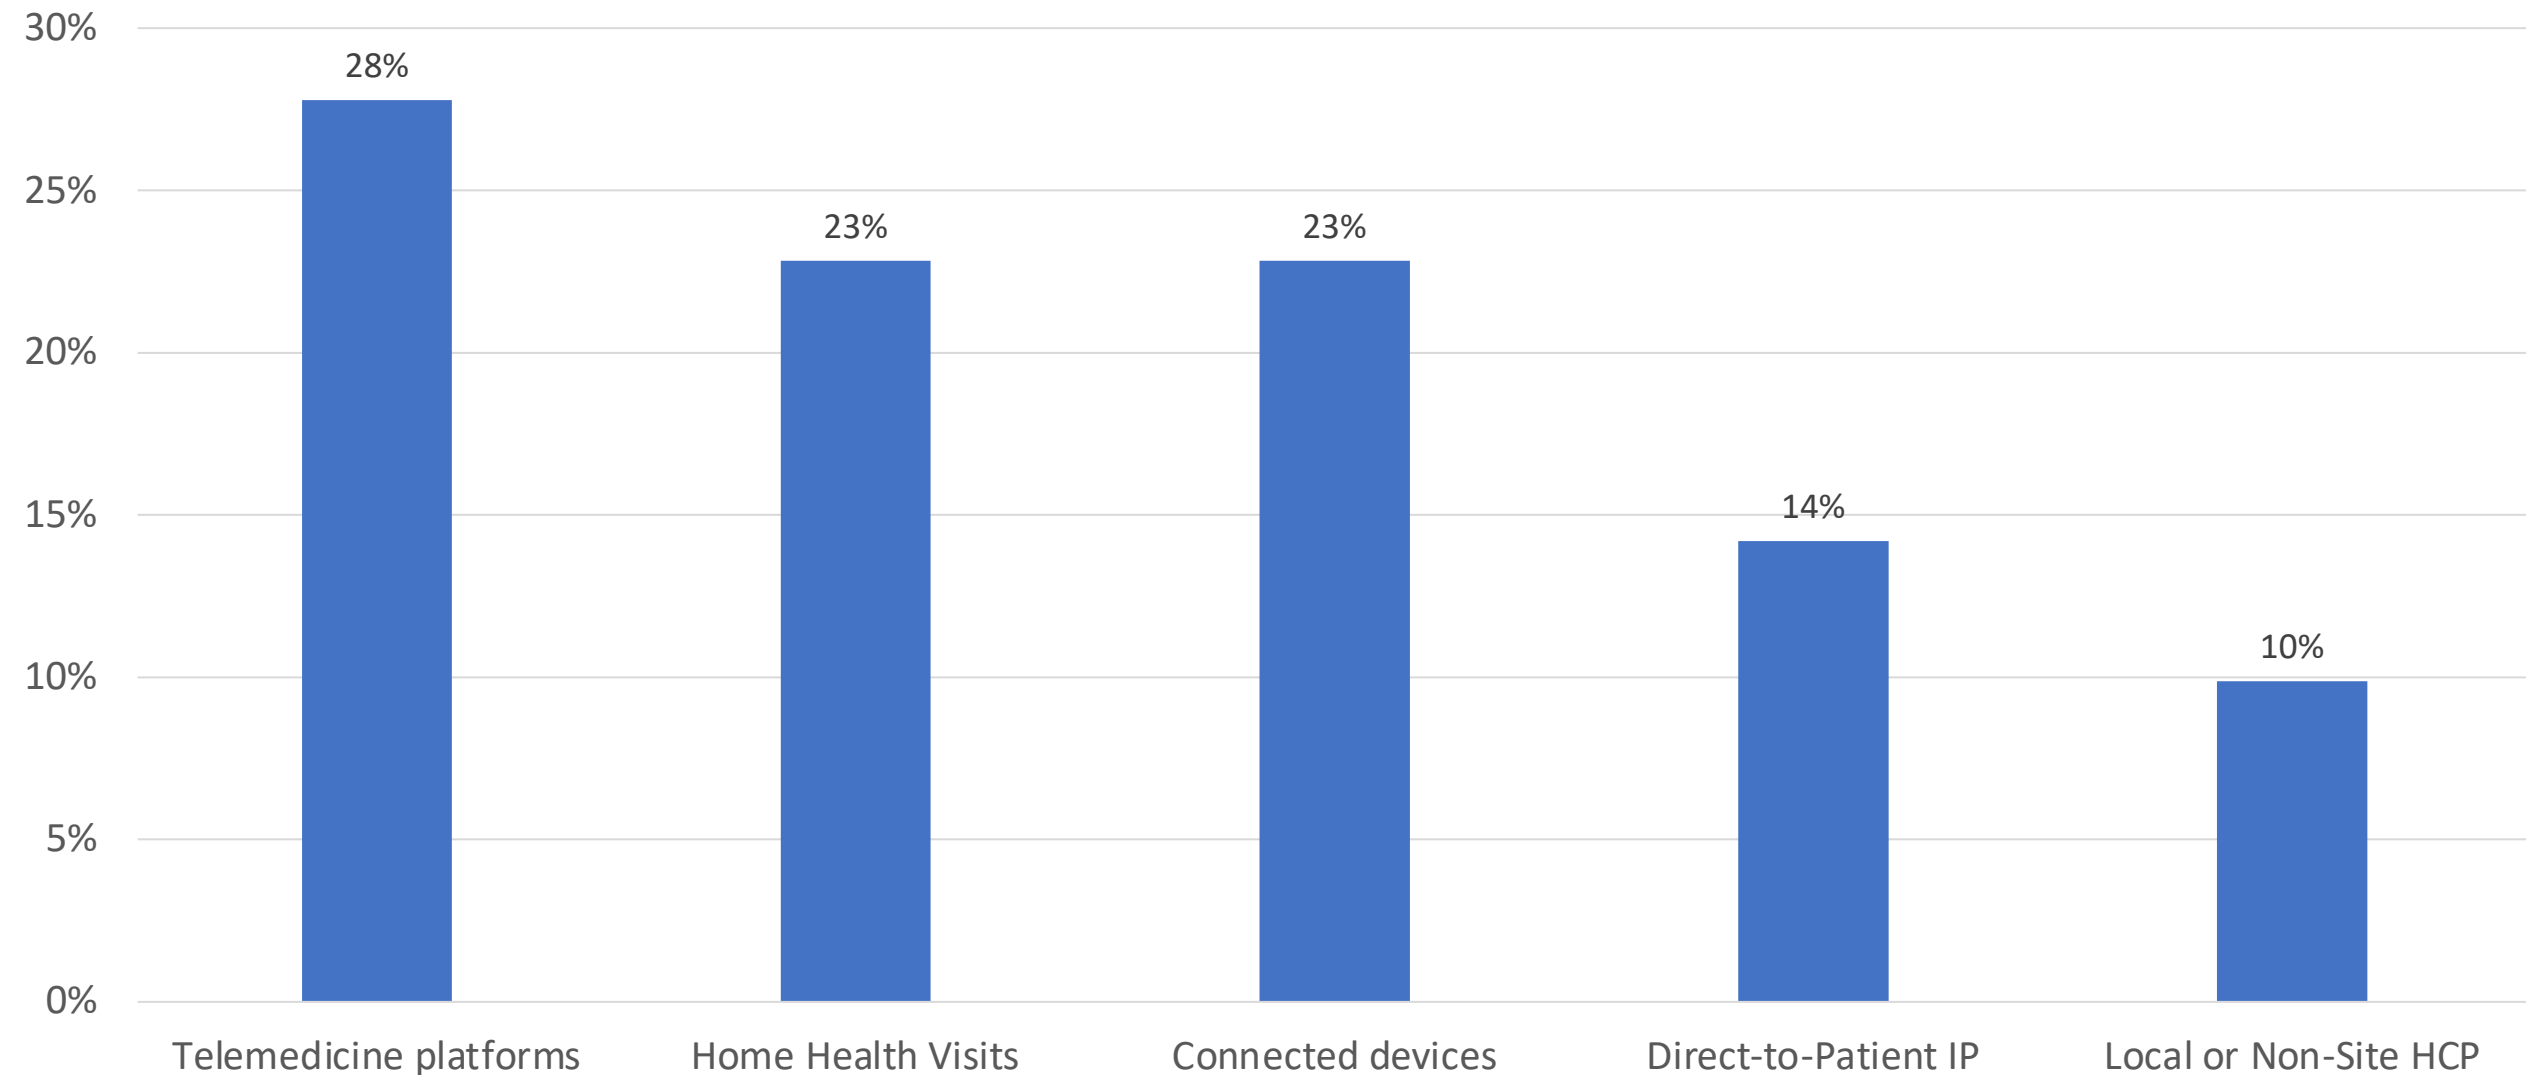

Which of the following technologies are you NOT using, that you intend to implement at your site? Select all that apply.

Which of the following technologies has your site invested in or adopted organizationally? This would be opposed to using just what a Sponsor or

Which of the following elements or components of a decentralized trial are you willing or planning to utilize at your site? Select all that apply

Which of the following elements or components of a decentralized trial are you currently able to or have utilized at your site? Select all that apply

Do you feel that training for trials with decentralized elements take more time than those without decentralized elements?

How much estimated time in number of hours does your site spend, per month per trial on average, on training for trials with decentralized elements as compared to a trial without decentralized elements?

Minimum	Maximum	Mean
0	90	17.52

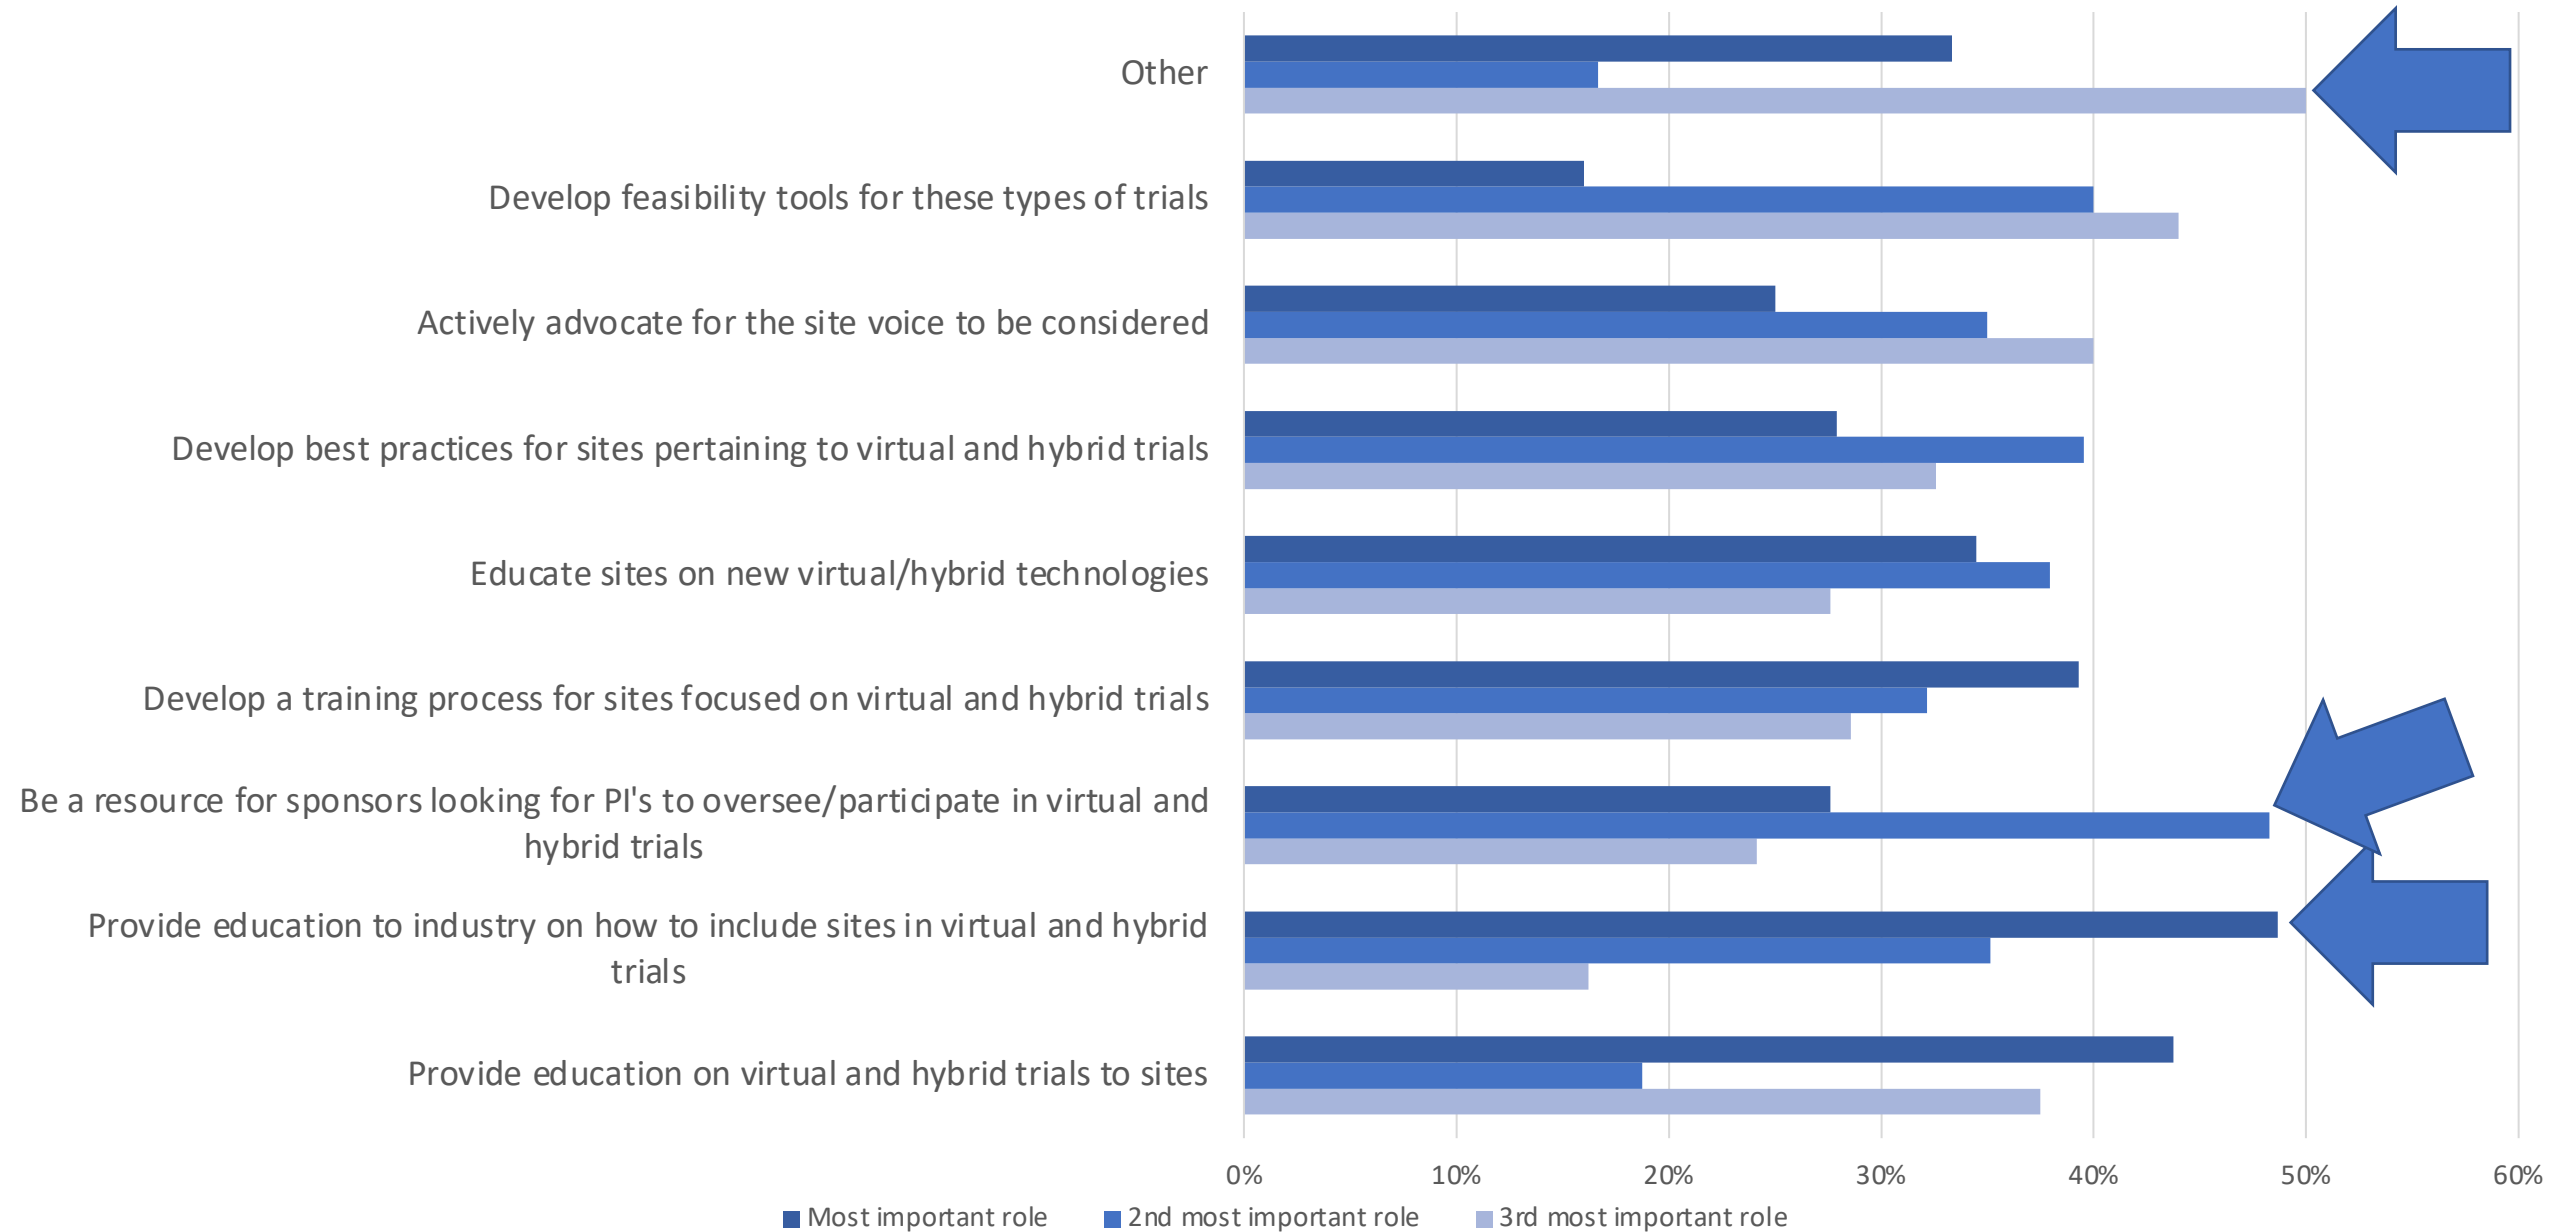

Do you predict that 100% decentralized / virtual trials, in which participants will not be seen at the study site, will have a negative effect on site sustainability?

Do you feel that your site is being fairly compensated for the work and effort involved in DCT's

What role could SCRS play with regards to virtual / decentralized and hybrid trials that would have the greatest impact for your company? (Rank the top 3)

Future Work –

- What does this mean?
- What do we do with this data?
- Do any data points stand out for us to incorporate?
- How does that affect our training program?

Future Work – Breakout Groups

- Breakouts – 45 minutes
- Establish the Starting and Ending point for this Journey
 - On or around Protocol design
- Assure focus – The site. This is for them and it needs to be focused on information they need
- What are the key positions of this journey? Elements, considerations, points of mention
 - What do the sites need to know along the way
 - What are the “stops” along the journey?
- After that, build out each of these “stops”
 - What does each one need to explain or portray?
 - What is the important information here?

Virtual Trial Capable Training

- ~30-minute series of video modules
- Check for Understanding
- Previous Training had
 - Introductory Video on DCTs
 - Tele-health best practices
 - Initiating Patient Contact
 - Capturing and Entering Patient Data
- What else do we want to have?
- Are these the right things?
- Issue a Certificate and badge post-completion
- Sponsor/CRO recognized

Project Work Progress

- Phase 1 – Definitions and Scope

- ✓ • Settle on terms to define, where to find definitions
- ✓ • Establish Scope and purpose of publication

→ Phase 2 – Recommendations

- Establish what sites need to be prepare for DCTs
 - Staffing, Finance, Operations, Technology, Regulatory

- Phase 3 – Recommendations Tool

- Checklist/reference guide

- Phase 4 – Resources Available

Recap and Next Steps

- Finalize Survey collection
- Continue to develop content for the Training
- Groups at next meeting

Thank you

Decentralized Trials Workstream Meeting
