

## SCRS Global Oncology

### Oncology Site Assessment and Engagement Meeting Summary February 2022

The team got right to work this month preparing to discuss the plan for this group in 2022. Time was spent reviewing the accomplishments from 2021 and what was left remaining. The intention of this exercise is to come to the next meeting prepared to discuss the committee's ideas for 2022's focus from an initiative perspective. Members will be expected to contribute at the next meeting, discussing marketing, benefit, and project ideas for the initiative.

Initial ideas included a refresh of the oncology membership and program information with the committees so they could easily share the SCRS mission and membership options with sites they encounter. The team also discussed virtual engagement options as other ways for sites and partners to interact. Finally, there was discussion on possible scholarship opportunities for members as it pertains to membership or even summit attendance. These options will be discussed in the coming meetings.

The preliminary data from the 2022 Oncology Site Landscape survey were discussed as well. These results will be made public at the **2022 Oncology Site Solutions Summit which was rescheduled for May 21 and 22nd.**
